

## PARITY Success Bulletin

### PARITY Wrap-Up!

When possible, please continue to maintain PARITY follow-up for any remaining patients. If you foresee any problems in completing follow-up visits, please contact the **Methods Center**. Please *ensure your ethics approval remains up-to-date* at this time. If your site did not enroll any participants, please complete all study close-out procedures and send required documents to the **Methods Centre**.

We will maintain our study close-out timeline to simultaneously publish the primary manuscript in a high-impact journal and present the findings at the **MSTS 2021 Annual Meeting**. All PARITY investigators and research personnel will be listed as study authors as per standard group publication practices. We will be in touch with you over the coming months to request an updated authorship list for your respective sites. Please see the anticipated study completion timeline below.

### Anticipated Study Completion Timeline

### PARITY Data Cleaning

Please continue to check iDataFax for remaining queries. All patients enrolled in **2018 or prior** should now be **query free**. Victoria will soon be sending out detailed queries for patients enrolled in the early months of 2019! You may check ongoing queries in the iDataFax database (refer to PARITY Newsletter February 2019 Edition 19). If you have any questions regarding queries on a patient, please contact **Victoria**.

### PARITY Adjudication

Event adjudication continues for the trial. **Tricia** may contact you requesting de-identified adjudication materials (chart notes, images and radiographs) for participants that you have reported as having any of the listed study events.

#### PARITY Methods Centre Contacts

**Dr. Michelle Ghert**, Principal Investigator  
ghertm@mcmaster.ca  
Tel: (905) 387-9495 ext. 64089

**Tricia Schneider**, Project Manager  
schnep@mcmaster.ca  
Mobile: (289) 244-6087

**Victoria Giglio**, Research Assistant
